2024 – 2023 Ratio Comparison

1.) KMBs profit margin increased 4% from 2023 to 2024 with 9% profit margin in 2023 and 14% profit margin in 2024. This means they kept a higher percentage from each dollar of sales. KMB had a net income increase of nearly \$814 million in 2024 which is where most of this increase comes from.

2.) Debt to Assets stayed the same in 2023 and 2024 which means they did not lower or increase how much of their assets are tied up in debts. Their debt to asset ratio is 94%

meaning 94% of their assets are financed with debt. This isn't a bad thing necessarily because these debts can be used to help grow the company further, especially with a reliable business like KMB.

3.) In 2023, KMB's free cash flow was \$1,188 Million while it was \$885 Million in 2024. This means in 2023 KMB had more "free cash" to spend than they did in 2024. This money can be used for debt repayments or to expand business operations.

Financial Statement Notes

1.) KMB's revenue recognition note says "Sales revenue is recognized at the time of product shipment or delivery...Sales are reported net of returns, consumer and trade promotions, rebates and freight allowed." This means that KMB actually records the real amount of money they have made on their income statement from the sale including all discounts and returns from stores, not just the price of the products they shipped out.

2.) The advertising expense note says "Advertising costs are expensed in the year the related advertisement or campaign is first presented through traditional or digital media." This means they record the cost of the advertising, the year that the ad is put out, not before it or after.

3.) KMB says "Research and development costs are charged to expense as incurred" This is a general rule under GAAP, which is basically the law or set rules for accounting. They are stating in the note that they follow this rule and it means that whenever research and development is done, the costs are reported as an expense right away.

4.) The note "Cash equivalents are short-term investments with an original maturity date of three months or less." is also a rule under GAAP, the rules of accounting, it states that for assets to be considered cash equivalents it has to be able to be cashed within 3 months or less.

5.) The note on leases says "Lease assets and lease liabilities are recognized at the commencement of an arrangement where it is determined at inception that a lease exists. Lease assets represent the right to use an underlying asset for the lease term, and lease

liabilities represent the obligation to make lease payments arising from the lease.” This means they record the lease and the liability of the lease, when they sign the lease. This is the company showing they are able to use the place they are renting and the costs they owe.
